

# Radioing! In the Rain

## Design Changes Document

### I. APIs

- Spotify → Spotipy
  - Instead of using Spotify as an API, we used the Spotipy module, in conjunction with the Playsound module.
  - So, instead of three APIs, we only used two.
- Google Geolocation -> freegeoip.net
  - Rather than using Google Geolocation, we used freegeoip.net to obtain a user's *latitude and longitude*, passing that along to Open Weather Map.

### II. Site Map
